(54) Title: APPARATUS FOR OPENING/CLOSING THE DOOR

(57) Abstract: The present invention refers to an apparatus for opening/closing the door according to the determining results whether or not password accords or not, based on the arrangement order and the number of the password. The present invention has a plurality of touch sensor arranged in a character shape. A password is inputted to controller in a character shape using a plurality of touch sensor. The controller enables the door to open according to the determining results whether or not a password inputted to the controller accords with a predetermined password. Hence, the present invention offers a password easy to store using a password of a character shape and provides a more reliable security as the password identification systematizes, by opening/closing the door using a password of character shape.

☐ Further documents are listed in the continuation of Box C.☒ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
